

Milovan Tomašević (1987)

looking for new job opportunities

My approach towards projects and work in general can be described in one sentence: I get inspired and moved by an excellent idea, which I really want to deliver into real life, so I work diligently to accomplish it. It doesn't matter what it takes. I get inspired by the vision I follow and disregard everything else because I am thinking about possible ways to get to the solution and how to accomplish my goals. It really makes me happy and alive. I honestly believe one should think out of the box, leave ordinary frames behind and strive to use alternative resources, meet new people, acquire new knowledge and skills – so that better solutions can be achieved. Plus, one needs to successfully overcome obstacles and work diligently. I believe in positive approach and the fact, that we will come to a solution. If not at that moment, then a bit later or the day after. But we will come to a solution.

WORK EXPERIENCE

2018 - 2020	High Performance Computing Consultant Faculty of Information Studies - Slovenia <ul style="list-style-type: none"> Python-dj, GIT, Docker, MPI, Ceph , Kubernetes , OpenStack, Singularity...
